Material in the following list is arranged according to the classification system used in the Society's Research Catalogue. Wherever possible, material is classified by region and is placed in the Regional Section. If this is not practical, it is classified by subject and is placed in the General Section. Within each regional division the material is further classified by subject. The subject classification used in both sections is given above in an abridged form, and the numbers in the right-hand margin of each page refer to this scheme.
